October, 2020 - April, 2021

TECHNICAL SKILLS

Software: Javascript, Node.js, HTML/CSS, Git, Bootstrap, jQuery, ES6

SOFTWARE PROJECTS

Personal Website: <https://lauraaupert.github.io/Portfolio/>

Quarantinis App

2020 – 2021

Javascript Developer - Collaborative Project

- Developed a mobile-first application where users can obtain random cocktail suggestions and targeted playlist
- Integrated several APIs to generate content and used localStorage to store it
- Programmed the entirety of the Javascript code
- Implemented parts of the styling and HTML/CSS coding
- Leveraged my knowledge of jQuery to DRY code
- Acted as master debugger for the team
- Languages: Javascript, jQuery, HTML/CSS. APIs: CocktailDB, Youtube API

Weather Dashboard App

2020

- Developed a weather app that allows users to search and save weather conditions in any city
- Used an API response to make a request to a second API
- Coded the app with no starting code or collaboration
- Utilized: jQuery, Javascript, HTML/CSS, Git, Bootstrap, localStorage, OpenWeatherMap API
